Woodline

For a genuine presentation! The showcard frame system "Woodline" made of massive, natural beech is offering various possibilities to use.

Regardless if used as single frame or complete stand - the appearance of this genuine product will always leave a special impression.

Frames in special sizes or other wood colours are possible upon request as from 50 pieces.

Note:

Being a natural product, varying shades of colour and veins are possible. Further fixing elements you will find in chapter accessories (*series 500*).

Showcard frames Woodline

Massive wooden frame made of natural beech, poster insert short side, max. poster thickness 4 mm. Also available with threaded insert M10 to take tubes without using a t-piece.

Plastics plug-in frames

This plug-in system, registered design of OEK is stable, light-weight and available in any size as from a quantity of 10 pieces. Offering the option to create countless combinations it can be used for fairs, in shopping windows and show rooms and, of course in shops.

Supplied in kit form (consisting of profiles, connectors and suspension rings) for self mount, thus saving space and transportation costs. Assembly is simple and you need no tools.

Colours: white and red.

Note:

Fastening elements suiting the plug-in system you will find in chapter accessories (series 500).

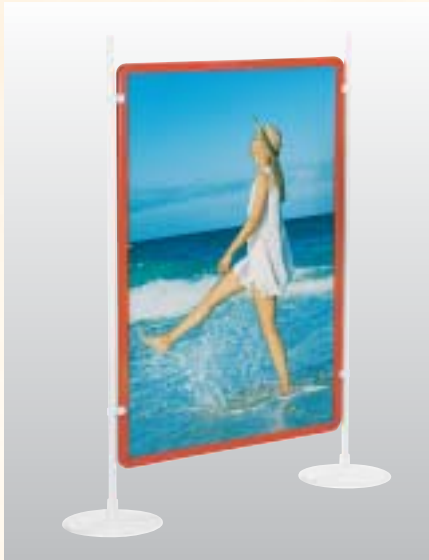

Plastics plug-in frame

Profiles made of durable, unbreakable plastics, poster insert short side, poster thickness up to 4,5 mm. Colours: white, red.

Plastics plug-in frame 4x4

By means of complimentary cross- and t-connectors you can build a multi-information frame. A large area to display information in its most attractive way, achieving additional attention by contrasting black connectors.

Subdivided into 4 frames A4, poster insert on the long outer sides, with black connectors, corners and suspension rings

- 15180-xx.....SU 10

Alu-profile frames

A system of convincing quality, designed to enable the most individual applications and handling even difficult installations. As from a quantity of 10 pieces alu-profile frames can be supplied in almost all sizes required.

By fitting leight-weight foam panels or similiar, the stable frame construction can be used to build up column panels, displays and walls and even exhibition booths.

Upon request supplied in kit form, thus saving space and transportation costs. The final assembly is more than easy: Simply put together and fastened by means of the attached Allen key.

Note:
Fastening elements suiting the alu-profile frames you will find in chapter accessories (series 500).

Alu profile frame

Stable, double-wall aluminium profile anodised, poster insert short side, poster thickness up to 4,5 mm
