A5 information holder
(double sided - shown with PVC top)

V210
A4 information holder
(double sided - shown with PVC top)

These items consist of an injection moulded clear styrene base with a clear PVC sheet, ideal for displaying single sheets of information. Alternatively, this product can be supplied as base only.

Bases are open ended to accommodate oversized literature. They can be moulded in a variety of house colours for volume orders (see back page for swatches).

Additionally, they can be silkscreened with your company logo or message, thereby increasing their value as a marketing tool.

UNIQUE ADJUSTABLE WALL MOUNTING SYSTEM

A superb, innovative product allowing for infinite flexibility in displaying your literature.

A product which can be set up to hold any size material, this system has the bonus that single pieces can be added on as required, with each additional module creating an extra 3 pocket display at less than half the cost of a standard brochure holder.

This unique system has been developed for use in all types of locations, especially where wall space is limited.

Three versions have been developed:

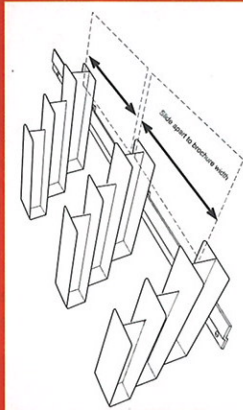

3PAS - for use with our unique clip-on aluminium strip.

AL95, incorporating a ticket strip facility. This system can turn whole walls into an adjustable display system which can be changed to accommodate any size of material - standard or not - at any time. Cut aluminium strip to the required length and screw to wall or display board through the holes provided.

The inclusion of a ticket strip enables you to highlight important information or special prices.

3PSW - for use with slat wall displays; modules clip into standard slat and slides to the required position.

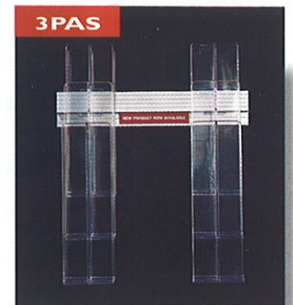

3PFB - for gluing; ideal for permanent displays.

Adjustable holders for use with slat wall displays

Adjustable holders for gluing onto walls for permanent displays

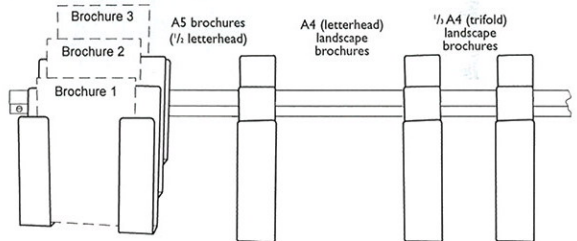

Adjustable holders with aluminium strip plus ticket strip facility

Each additional module provides 3 more pockets

EXAMPLE

Just 5 modules on the 95cm (37") strip provides a 12 pocket display of A4 (letterhead) size literature. 9 modules allows for a 24 pocket display of 1/3rd A4 (trifold) literature. 7 modules for an 18 pocket display of A5 (1/2 letterhead) literature. Or mix and match to display your literature to maximum advantage.

BROCHURE HOLDER WALL SYSTEM

A simple installation method, providing a smooth and even presentation for displaying literature on a wall surface.

Designed to hold A4 and 1/3rd A4 size literature, this wall system is supplied in kit form for easy installation.

WS16-D8 kit includes all components to create an illustrated display.

OPTIONAL EXTRAS

OVERPRINTING

Add that little bit extra to your display!

Personalise dispensers with your company logo, a message or an advertising slogan.

We can offer you a customised silk screening service, printed directly onto your dispensers.

CUSTOMISED COLOURS

Add a splash of colour to your display!

In addition to our standard crystal styrene holder, many of our products can be reproduced in a range of colours.

This service is available for volume orders only.
